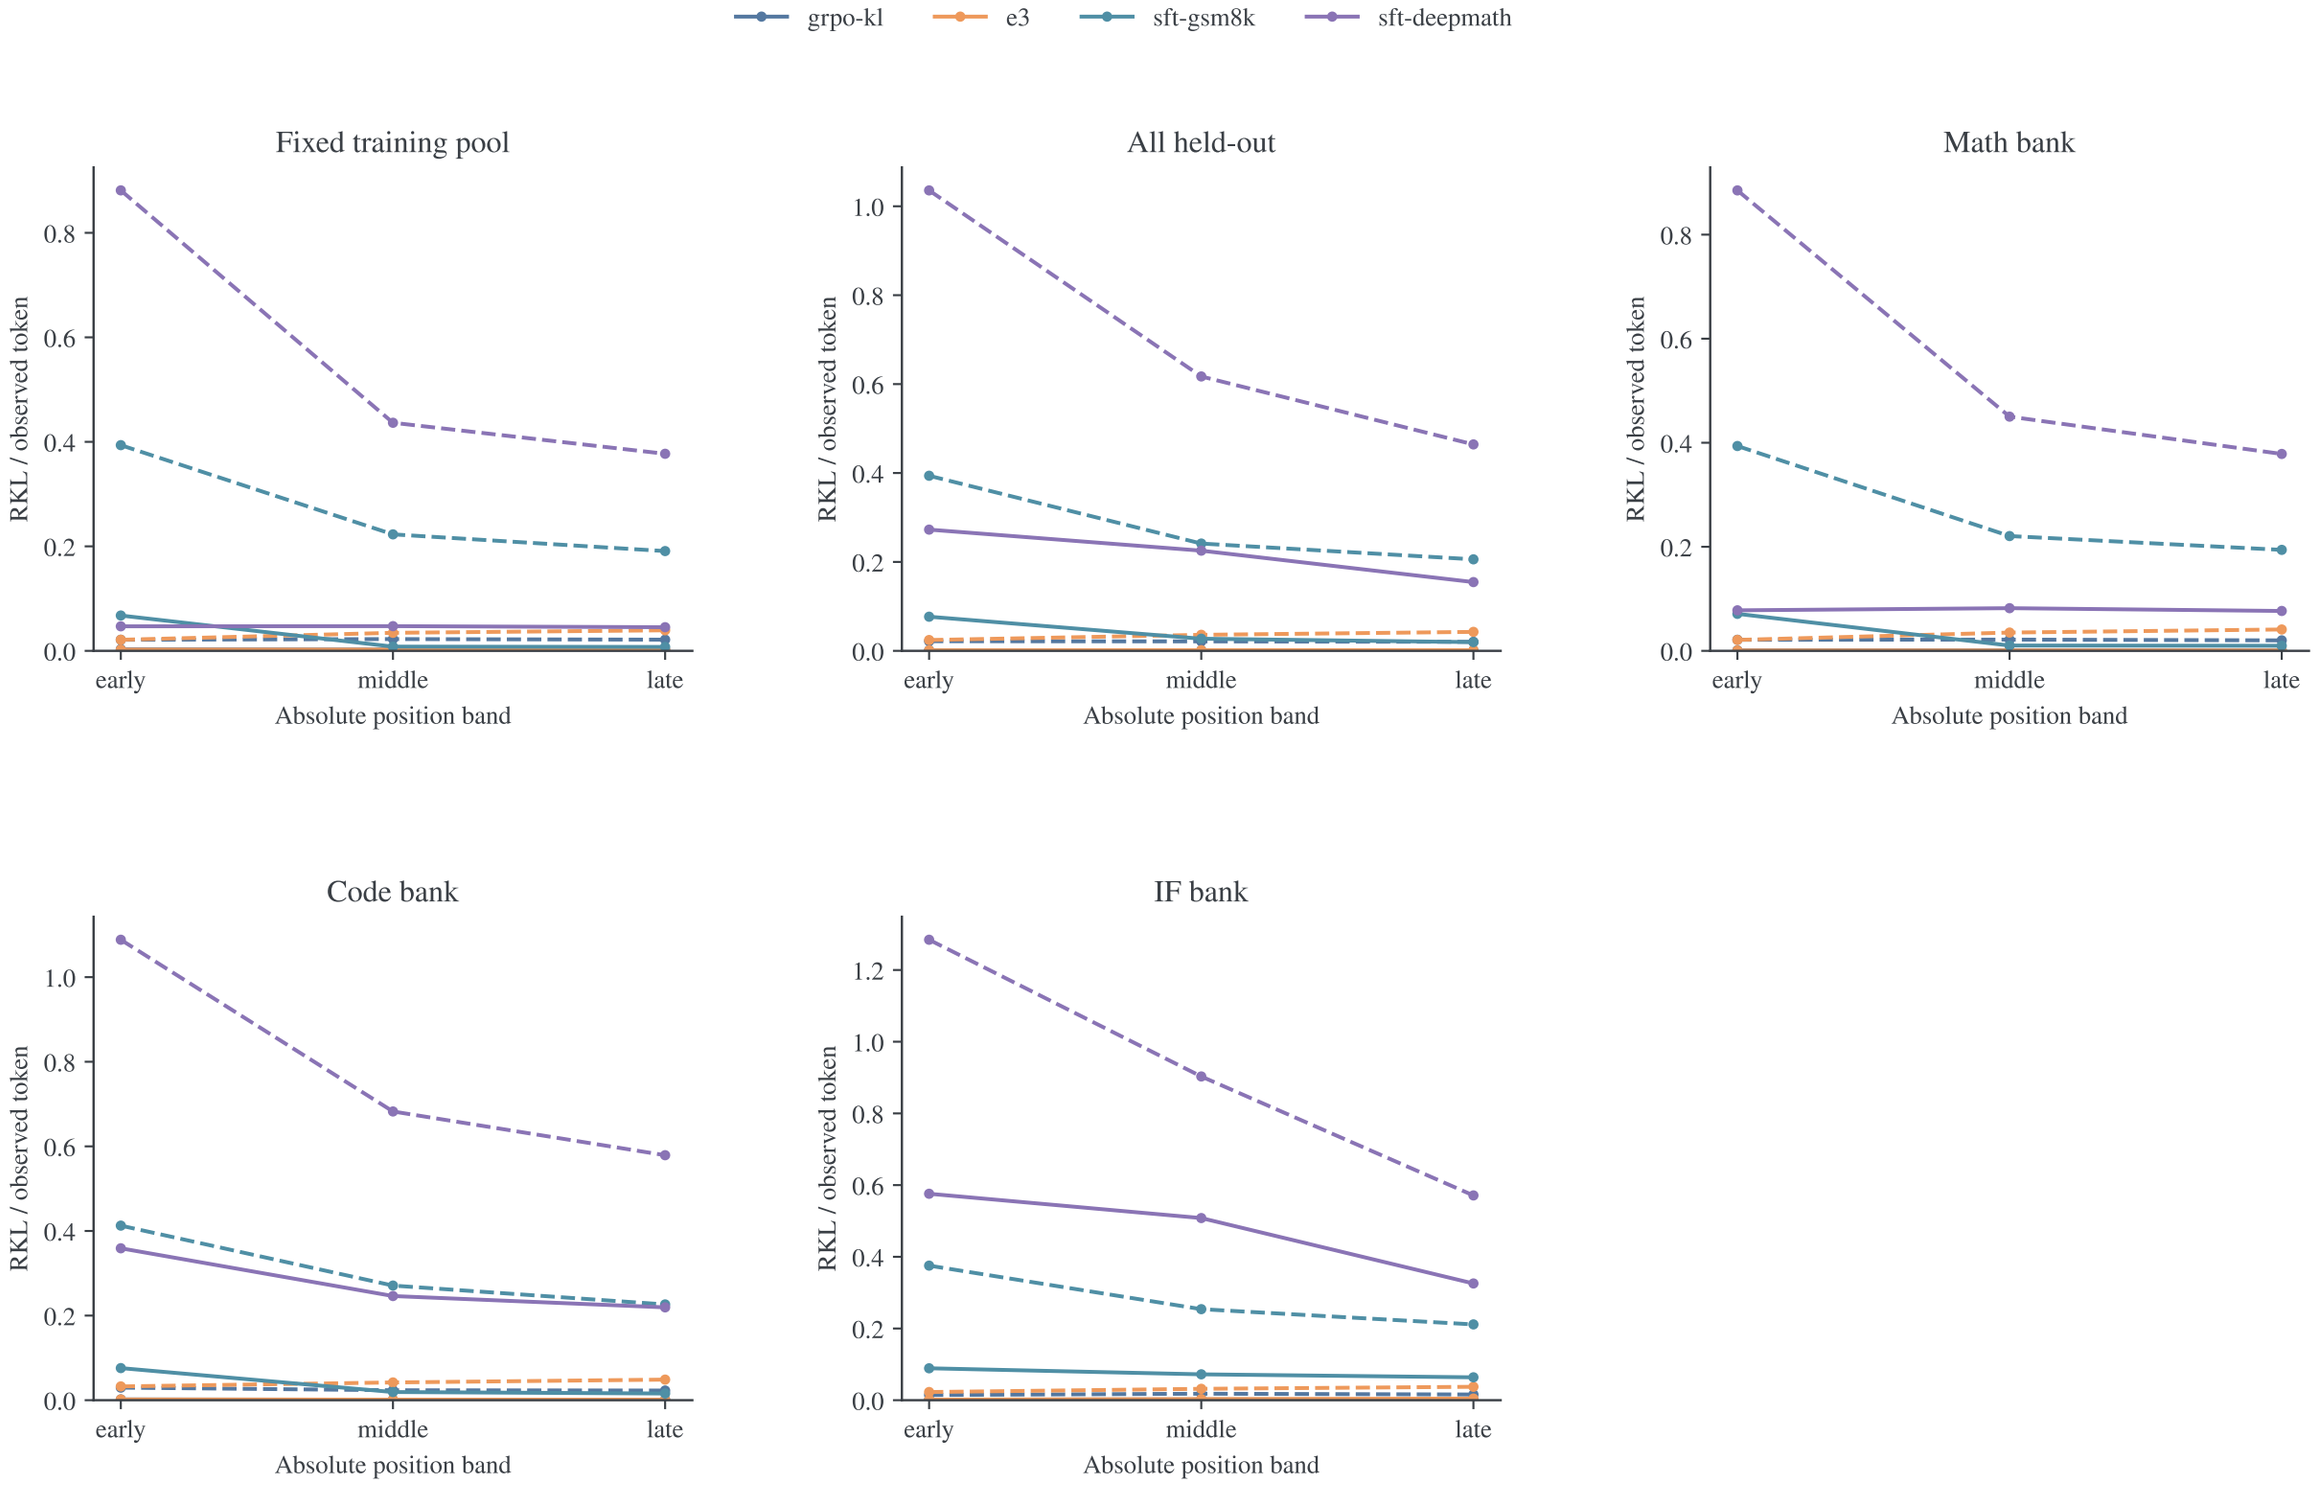
q3-1.7: same-size checkpoint comparison, 320 updates

RKL: initial and final position profiles



Dashed: update 0; solid: update 320. early=0-255, middle=256-511, late=512-1023; categorical spacing, unequal token spans.

First pass only; no repeated-batch round. Same size does not establish direct ancestry.

post-trained dual-mode; thinking input; native_old_thinking
