Training response length
Validation length | Macro-5
Validation length | AIME mean
AIME length-limit stops
AIME repetition stops
AIME EOS / stop
Mean tokens
Responses (%)
Optimizer updates
E82 | token-mean
E83 | seq-mean-token-mean
Train cap 16,384; valid cap 31,744. Benchmark means are equally weighted.
EOS / stop is an engine finish category, not a guarantee of coherent reasoning.
