
E100: How many directions carry the energy?
t=16
t=64
t=192
t=640
16-32
48-64
128-192
480-640
weight: cumulative energy fraction
update: cumulative energy fraction
increment: cumulative energy fraction
Retained rank / full singular dimension
196/196 matrices; 28 full layers. Median and IQR; increments use stored 65-point energy CDF interpolation.
