E100: Full weights and updates have different frames
W0 to Wt
delta16 to deltat
k=16: median principal angle (degrees)
k=64: median principal angle (degrees)
k=256: median principal angle (degrees)
Optimizer updates
196/196 matrices; 28 full layers. Both use right subspaces. Different references: W0 versus cumulative update at step 16.
