E101: spectral shape dynamics
Attention
MLP
Full weight: SD variation / interval
Full weight: Net SD change / optimizer step
Full weight: SD distance to final checkpoint
1e−6
Cumulative update: SD variation / interval
Cumulative update: Net SD change / optimizer step
Cumulative update: SD distance to final checkpoint
Optimizer updates (interval end)
Median and IQR; 196/196 matrices; 28 full layers. Unequal intervals; net speed is not path length.
