E102: Principal-angle shapes and ECDFs
t=16
t=64
t=192
t=480
k=16: angle (degrees)
k=64: angle (degrees)
k=256: angle (degrees)
Principal-angle quantile
k=16: fraction of angles
k=64: fraction of angles
k=256: fraction of angles
Principal angle (degrees)
196/196 matrices; 28 full layers. Matrix medians and IQR; quantile curves interpolated at 33 points; ECDF exact at 5-degree grid.
