

(a) JustRL-Math, Nemotron-Science/IF

(b) JustRL-Science/IF, Nemotron-Math

(c) Cascaded OPD, GPQA-Diamond

Figure 5. A tug-of-war between the teachers can be observed during MOPD training. (a,b) highlighted red boxes show that the MOPD student's performance ***first tracks*** the JustRL-only training curve and ***later drifts toward*** the Nemotron-only training curve, under both settings. (c) In cascaded OPD (one teacher then the other), GPQA performance rises sharply under the guidance of Nemotron-1.5B with science prompts and then drops back by the subsequent JustRL-1.5B with math prompts, decoupling the effect of multi-teacher in the temporal dimension.
